Title: _____

Intro: _____

Design Your Experiment

1. observation
What did you notice about people and their emotions when they view media that is inspiring your experiment?

2. hypothesis
What single idea will you attempt to prove or disprove about people and emotions related to media?

4. conclusion
What imaginary results did your imaginary experiment produce? What did you do with this information? Based on these results what improvements will you make or new questions will you ask?

3. experiment
How will you test this idea? What media will you use? What method and technology will you use to make measurements?

EXTRA: Draw the setup of your lab or experiment on the back of this sheet.
